### Properties can be let if they have an energy rating from A to E.

Rules on letting this property

You can read guidance for landlords on the regulations and exemptions.

### property This property's current energy rating is C. It has the potential to be C.

**Energy rating** 

Score

**Energy efficiency rating for this** 

See how to improve this property's energy performance.

92+ B 81-91 69-80 70 I C 72 I C 55-68 39-54 21-38 G 1-20

Current

**Potential** 

Properties are given a rating from A (most efficient) to G (least efficient).

The graph shows this property's current and potential energy efficiency.

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

• the average energy score is 60

performance

• the average energy rating is D

- This section shows the energy performance for features of this property. The

### assessment does not consider the condition of a feature and how well it is working. Each feature is assessed as one of the following:

Breakdown of property's energy

very good (most efficient) good average

poor

- very poor (least efficient)
- When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and
- type.

**Description** Rating **Feature** Wall Cavity wall, as built, insulated (assumed) Good Window Fully double glazed Good

vvindow	Fully double glazed	Good		
Main heating	Room heaters, electric	Very poor		
Main heating control	Programmer and appliance thermostats	Good		
Hot water	Electric immersion, standard tariff	Very poor		
Lighting	Low energy lighting in all fixed outlets	Very good		
Roof	(another dwelling above)	N/A		
Floor	Solid, insulated (assumed)	N/A		
Secondary heating	None	N/A		
Primary energy use				
The primary energy use for this property per year is 247 kilowatt hours per				

This property's potential

the people living at the property.

production

save money.

(72).

What is primary energy use?

square metre (kWh/m2).

**Environmental impact of this property** 

This property's current environmental impact rating is C. It has the potential to be C.

#### Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.

Properties with an A rating produce less CO2 than G rated properties. An average household produces 6 tonnes of CO2

This property produces 1.6 tonnes of CO2

1.5 tonnes of CO2

Potential energy

rating

By making the <u>recommended changes</u> , you could reduce this property's CO2 emissions by 0.1 tonnes per year. This will help to protect the environment.	1
Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by	

Improve this property's energy

performance By following our step by step recommendations you

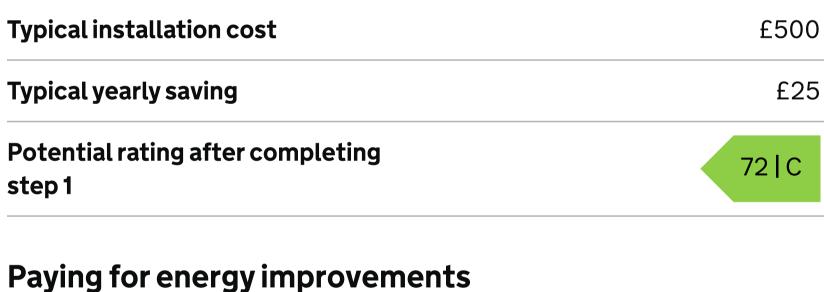

► Do I need to follow these steps in order?

could reduce this property's energy use and potentially

Carrying out these changes in order will improve the

property's energy rating and score from C (70) to C

**Step 1: High performance external doors** High performance external doors

You might be able to get a grant from the Boiler Upgrade Scheme. This will

help you buy a more efficient, low carbon heating system for this property.

Find energy grants and ways to save energy in your home.

### Estimated energy use and potential savings

is used by the people living at the property.

each recommended step in order.

Heating use in this property

insulation in this property.

Estimated energy used to heat this property

£491 Estimated yearly energy cost for this property £25 **Potential saving** The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy

The potential saving shows how much money you could save if you complete

For advice on how to reduce your energy bills visit Simple Energy Advice.

Heating a property usually makes up the majority of energy costs.

Type of heating Estimated energy used **Space heating** 1369 kWh per year

Potential energy savings by installing insulation

### Water heating 1474 kWh per year The assessor did not find any opportunities to save energy by installing

### If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly. If you are still unhappy after contacting the assessor, you should contact the
